

Sources

NATSPEC refers to documents produced by a number of organisations other than Standards Australia. A number of these organisations are Australian but many are based overseas. Some of the latter have Australian agents, some of the former have outlets only in one state. This list is the key to sources for these documents. Where possible an Australian source is listed. Information given in this document is believed to be correct at the time of printing - please advise us of any changes or errors you may come across.

This list includes references from all NATSPEC specifications:

General Sources

CORPORATE INFORMATION

NATSPEC is the trading name of Construction Information Systems Limited, ABN 20 117 574 606.

NATSPEC, founded in 1975, is a not-for-profit organisation that is owned by the design, build, construct and property industry through professional associations and government property groups. It is impartial and is not involved in advocacy or policy development.

NATSPEC's major service is the provision of the comprehensive national specification systems endorsed by government and professional bodies. NATSPEC, the National Building Specification, is for all building structures, with specialist packages for architects, interior designers, landscape architects, structural engineers, service engineers and domestic owners. AUS-SPEC is the Local Government specification system for the life-cycle management of assets. Packages include Urban and Open Spaces, Roadworks and Bridges, Public Utilities, and Maintenance.

NATSPEC's objective is to improve the quality of construction in Australia through its updating services and via the provision of information, tools, products and other services.
