

0181P BOSTIK IN ADHESIVES, SEALANTS AND FASTENERS**Branded worksection**

This branded worksection *Template* has been developed by NATSPEC in conjunction with **BOSTIK Australia Pty Ltd** and may be used whilst the Product Partner is licensed to distribute it. The copyright remains with NATSPEC. As with all NATSPEC worksections, it is the responsibility of the user to make sure it is completed appropriately for the project. The user should also review its applicability for local conditions and regulations. Check www.natspec.com.au for the latest updated version.

Worksection abstract

This branded worksection *Template* incorporates BOSTIK adhesives and sealants. It is applicable to projects that require adhesives and sealants as part of general construction.

Background

Additional particular worksection applications may also be specified here, if they are considered integral to the performance of a building system. Those worksections may then cross reference this worksection for that particular building system in addition to the *0171 General requirements* worksection's default cross referencing.

Alternatively, for some applications, it may be preferable to incorporate the particular adhesive, sealant or fasteners within the relevant worksection, for example adhesives for ceramic, stone and terrazzo tiling or fasteners for profiled sheet metal roofing and cladding. In such cases the selection may be made within the relevant worksection.

Guidance text

All text within these boxes is provided as guidance for developing this worksection and should not form part of the final specification. This *Guidance* text may be hidden or deleted from the document using the NATSPEC Toolbar or the hidden text *Hide* and *Delete* functions of your word processing system. For additional information visit FAQs at www.natspec.com.au.

Optional style text

Text in this font (blue with a grey background) covers items specified less frequently. It is provided for incorporation into *Normal* style text where it is applicable to a project.

Related material located elsewhere in NATSPEC

If a listed worksection is not part of your subscription package and you wish to purchase it, contact NATSPEC.

Related material may be found in other worksections. See **Application Schedule** under **SELECTIONS** for relevant worksection references for the following requirements:

- Adhesives.
- Anchors.
- Sealing, pointing and bedding.
- Sealing structural designed control joints.
- Fire-resistant sealants.

Material not provided by BOSTIK

This branded worksection includes generic material which may not be provided by the Product Partner including:

- Fasteners.

Documenting this and related work

You may document this and related work as follows:

- Location and details of joints are best shown on the drawings.
- For guidance on sealant selection, refer to NATSPEC TECHnote DES 017.
- For guidance on ceramic tiling adhesive selection, refer to NATSPEC TECHnote PRO 004.

The *Normal* style text of this worksection may refer to items as being documented elsewhere in the contract documentation. Make sure they are documented.

Specifying ESD

The following may be specified by retaining default text:

- Fasteners: Corrosion resistance for durability to improve material life cycle.

The following may be specified using included options:

- Adhesives: Limiting VOC levels.
- Architectural sealants: Limiting VOC levels.

Refer to the NATSPEC TECHreport TR 01 on specifying ESD.

1 GENERAL

Bostik Australia is supported by a worldwide research and development resource keeping it at the forefront with new and innovative technologies. The company is committed to providing sustainable and innovative solutions that combine technological performances, ease of use, cost effectiveness and respect for the environment.

1.1 RESPONSIBILITIES

General

Requirement: Provide BOSTIK adhesives and sealants with fasteners, as documented.

Documented is defined in *0171 General requirements* as meaning contained in the contract documents.

Performance

Requirements: Conform to the following:

- Fitness for purpose: Capable of transmitting imposed loads, sufficient to maintain the rigidity of the assembly, or integrity of the joint.
- Finished surface: That will not cause discolouration.
- Compatibility: Compatible with the products to which they are applied.
- Sealant replacement: Capable of safe removal without compromising the application of the replacement sealant for future refurbishment.
- Movement: If an adhered or sealed joint is subject to movement, select a system certified to accommodate the projected movement under the conditions of service.
- Fasteners: Suitable for the particular use, capable of transmitting imposed loads and maintaining the rigidity of the assembly.

1.2 COMPANY CONTACTS

BOSTIK technical contacts

Website: www.bostik.com/australia/customer-support/technical-support

1.3 CROSS REFERENCES

General

Requirement: Conform to the following:

- *0171 General requirements*.

0171 General requirements contains umbrella requirements for all building and services worksections.

List the worksections cross referenced by this worksection. *0171 General requirements* references the *018 Common requirements* subgroup of worksections. It is not necessary to repeat them here. However, you may also wish to direct the contractor to other worksections where there may be work that is closely associated with this work.

NATSPEC uses generic worksection titles, whether or not there are branded equivalents. If you use a branded worksection, change the cross reference here.

1.4 MANUFACTURER'S DOCUMENTS

Technical manuals

Data sheets: www.bostik.com/australia/Bostik-Products/

Warranty: www.bostik.com/australia/customer-support/warranty-information

1.5 SUBMISSIONS

Products and materials

Sealants: Submit technical data sheets.

Samples

Visible joint sealants: Submit colour samples.

Tests

0171 General requirements covers tests in **Definitions** and calls for an inspection and testing plan under **SUBMISSIONS, Tests**.

Site tests: Submit results as follows:

- Installed sealant tests: [complete/delete]

Detail the tests required in **PRODUCTS** or **EXECUTION**, as appropriate, and list the submissions required here.

Compatibility testing: Submit adhesion and compatibility testing data demonstrating that adhesive, sealant or fastener is compatible with materials to be fixed and is suitable for the project conditions.

Warranties

Manufacturer's warranty: Submit the manufacturer's published product warranties.

Sealants and tile adhesives:

- Warranty period: 10 years.
- Warranty terms: As offered by BOSTIK.

1.6 INSPECTION

Notice

Inspection: Give notice so that inspection may be made of prepared joints and penetrations for each sealant application included in the **Installed sealant tests schedule**.

Delete this subclause if installed sealant tests are not included.

2 PRODUCTS

2.1 GENERAL

Product substitution

Other products: Conform to PRODUCTS, **GENERAL, Substitutions** in *0171 General requirements*.

The *0171 General requirements* clause sets out the submissions required if the contractor proposes alternative products. Refer also to NATSPEC TECHnote GEN 006 for more information on proprietary specification.

Product identification

General: Marked to show the following:

- Manufacturer's identification.
- Product brand name.
- Product type.
- Quantity.
- Product reference code and batch number.
- Date of manufacture.

Edit the list to suit the project or delete if not required.

2.2 BOSTIK GENERAL ADHESIVES

Bostik UltraGrip

Description: Plasterboard stud adhesive.

VOC: 23 g/litre.

Bostik Xtreme High Tack

Description: Extremely high strength and high early grab adhesive based on modified silyl (MS) polymer technology.

VOC: 36 g/litre.

Colour: White.

Bostik No More Nails

Description: Solvent based construction adhesive.

VOC: 310 g/litre.

Colour: Beige.

Bostik No Nails Instant

Description: Water based fast grab construction adhesive.

VOC: 9 g/litre.

Colour: Straw.

2.3 BOSTIK FLOORING ADHESIVES

Bostik Ultraset DX

Description: Solvent-based, foaming, polyurethane timber floor adhesive.

VOC: 97 g/litre.

Colour: Brown.

Bostik Ultraset S

Description: Solvent-based, overlay polyurethane timber flooring adhesive.

VOC: 44 g/litre.

Colour: Brown.

Bostik Ultraset HP

Description: Solvent-free and isocyanate-free, MS polymer-based, elastomeric timber flooring adhesive.

VOC: 8 g/litre.

Colour: Brown.

Bostik Ultraset SF

Description: Solvent-free polyurethane timber flooring adhesive.

VOC: 2 g/litre.

Colour: Brown.

Bostik Ultraset Singlestep2

Description: high performance timber flooring adhesive, moisture control and sound reduction membrane all in one.

VOC: 0 g/litre.

Colour: White with black thickness spacers.

Bostik Greenforce

Description: High performance adhesive and moisture control membrane all in one.

VOC: 0 g/litre.

Colour: White.

2.4 BOSTIK TILING ADHESIVES

ASA Asaflex

Description: Two part tile adhesive.

VOC:

- Powder: 1 g/litre.

- Liquid: 21 g/litre.

ASA Conflex

Description: All-round tile adhesive.

VOC: 1 g/litre.

ASA Prontofix

Description: Fast setting tile adhesive.

VOC: 1 g/litre.

Colour: White.

ASA Superglue

Description: Light weight, high performance tile adhesive.

VOC: 1 g/litre.

Colour: White.

ASA Ultra Mastik

Description: Tile adhesive.

VOC: 0 g/litre.

Colour: White.

ASA Expressfix

Description: Rapid drying and fast hardening cement based tile adhesive.

VOC: 0 g/litre.

Colour: Grey.

2.5 BOSTIK PLUMBING ADHESIVES

Bostik PVC Pipe Cement - Type N (non-pressure)

Description: High bond strength PVC-U pipe cement designed for installation of pipes and fittings subject to non-pressure applications.

VOC: 732 g/litre.

Colour: [complete/delete]

Select from Blue or Clear.

Bostik PVC Pipe Cement Slow Setting - Type N (non-pressure)

Description: High bond strength slow setting PVC pipe cement.

VOC: 723 g/litre.

Colour: Blue.

Bostik PVC Pipe Cement - Type P (pressure)

Description: High bond strength PVC-U pipe cement designed for installation of pipes and fittings subject to high pressure.

VOC: 764 g/litre.

Colour: [complete/delete]

Select from Green or Clear.

Bostik PVC Priming Fluid

Description: Cleans and primes PVC-U pipes, fittings and sheeting before the application of Bostik PVC Pipe Cement.

VOC: 804 g/litre.

Colour: [complete/delete]

Select from Red or Clear.

2.6 BOSTIK CONSTRUCTION GROUTS

Bostik Flowfill GP

Description: A general purpose, non-shrink (Class A), cementitious grout.

Ideal for most void filling grouting jobs. Application thicknesses from 20 mm to 120 mm.

VOC: 1 g/litre.

Colour: Cement grey.

Bostik Flowfill Panel Grout

Description: A general purpose, non-shrink (Class A) cementitious grout.

Enhanced working life. Ideal for precast and tilt-up panel work. For application thicknesses from 20 mm to 120 mm.

VOC: 1 g/litre.

Colour: Cement grey.

Bostik Flowfill UW

Description: A purpose designed, non-shrink (Class A) grout for underwater grouting applications.

Can be used for free flow or pumped grouting applications underwater or in tidal zones. For application thicknesses from 20 mm to 150 mm.

VOC: 1 g/litre.

Colour: Cement grey.

Bostik Techflow GP

Description: A high performance, multi-purpose, non-shrink (Class C) cementitious grout.

For application thicknesses from 10 mm to 140 mm.

VOC: 1 g/litre.

Colour: Cement grey.

Bostik Techflow HES

Description: A high performance, rapid setting and high early strength, non-shrink (Class C) cementitious grout.

For application thicknesses from 10 mm to 90 mm.

VOC: 1 g/litre.

Colour: Cement grey.

Bostik Techflow HS

Description: A high performance, non-rapid setting and non-shrink (Class C) cementitious grout.

For application thicknesses from 10 mm to 140 mm. Designed to maximise a high ultimate strength.

VOC: 1 g/litre.

Colour: Cement grey.

Bostik Techflow LA

Description: A high performance, high flow and non-shrink (Class C) cementitious grout.

Designed for large application thicknesses from 10 mm to 400 mm.

VOC: 1 g/litre.

Colour: Cement grey.

Bostik Patchfix Concrete

Description: A high performance, rapid setting, high early strength and shrinkage compensated repair concrete.

For patching concrete roadways, pavements and floors. Minimises shut down time and allows the repair back in service in 2 to 3 hours.

VOC: 1 g/litre.

Colour: Cement grey.

Bostik Patchfix Fine Render

Description: A polymer modified fairing mortar.

For applications in thin layers, producing a natural concrete grey appearance to concrete and masonry surfaces. Can be applied from feather edge up to a maximum thickness of 5 mm.

VOC: 1 g/litre.

Colour: Cement grey.

Bostik Patchfix Structural HB

Description: A heavy duty, polymer modified, high build structural repair mortar with a high ultimate compressive strength and abrasion resistance.

Can be used for vertical, horizontal and overhead applications.

VOC: 1 g/litre.

Colour: Cement grey.

2.7 SEALANTS

Standards

General: To ISO 11600.

NATSPEC TECHnote DES 017 offers selection guidance.

Alternatively, consult with a manufacturer and select a product to suit the application.

Total VOC limits

Requirement: Conform to the following:

- Architectural sealants: [complete/delete]

Limiting VOC levels improves indoor air quality. Refer to Green Star submission guidelines to complete the prompts.

Conformance testing: To South Coast Air Quality Management District Rule 1168.

Consider editing and changing this *Optional* style text to *Normal* style text if required as a general quality standard.

2.8 BOSTIK GENERAL SEALANTS

Bostik 6S

Description: Sanitary grade, neutral cure silicone for wet areas.

VOC: 58 to 65 g/litre, depending on the colour.

Colour: [complete/delete]

See the Technical Datasheet for colour selection.

Bostik Xtreme Flex

Description: High performance, permanently flexible general purpose sealant and adhesive based on MS polymer technology.

Maximum elongation of 400% once cured.

VOC: 37 g/litre.

Colour: [complete/delete]

Select from Black, White or Grey.

Bostik Xtreme ClearFix

Description: High performance, ultra-transparent sealant and adhesive based on MS polymer technology.

Cures to an invisible seal.

VOC: 36 g/litre.

Colour: Crystal clear.

Bostik Roof & Gutter Premium

Description: One component silicone sealant.

High UV, weather and water resistance. High adhesion to wide range of substrates including decorative sheet metal, such as Colorbond®.

VOC: 33 to 105 g/litre, depending on the colour.

Colour: [complete/delete]

See the Technical Datasheet for color selection.

Translucent and Grey are suitable for potable drinking water applications.

Bostik Seal N Flex 1

Description: Single component polyurethane construction joint sealant for general construction applications.

High weather resistance, flexibility and application viscosity.

VOC: 64 to 74 g/litre, depending on the colour.

Colour: [complete/delete]

See the Technical Datasheet for colour selection.

Bostik Seal N Flex FC

Description: Fast cure, single component construction sealant.

High weather resistance and flexibility once cured.

VOC: 78 g/litre.

Colour: [complete/delete]

Select from Black, Grey, White.

2.9 BOSTIK SPECIALTY SEALANTS

Bostik V2

Description: High performance glazing silicone.

VOC: 1 g/litre.

Colour: [complete/delete]

Select from Black, Translucent, White.

Bostik 5CLM

Description: High joint movement weatherproofing silicone sealant.

VOC: 40 g/litre.

Colour: [complete/delete]

Select from White, Charcoal, Grey, Beige.

Bostik V60

Description: High performing glazing weatherproofing silicone sealant.

VOC: 39 to 47 g/litre, depending on the colour.

Colour: [complete/delete]

Select from Silver, Translucent, White, Grey, Black, Matt Black.

Bostik V70

Description: Structural silicone sealant.

VOC: 43 g/litre.

Colour: Black.

2.10 BOSTIK FIRE-RESISTING SEALANTS

Bostik Fireban One

Description: A fire-resisting, low modulus, single component, Class-A polyurethane sealant.

VOC: 64 g/litre.

Colour: Limestone.

Fire-stopping: To AS 4072.1 and tested AS 1530.4.

Bostik Firecaulk

Description: Fire-resisting acrylic (water-based) sealant.

VOC: 34 g/litre.

Colour: [complete/delete]

Select from White, Off White, Grey, Limestone.

Fire-stopping: To AS 4072.1 and tested to AS 1530.4.

Bostik Xtreme Fire Seal

Description: High performance, fire retardant sealant based on MS polymer technology.

VOC: 28 g/litre.

Colour: [complete/delete]

Select from White, Off White, Grey, Limestone.

Fire-stopping: To AS 4072.1 and tested to AS 1530.4.

2.11 GENERIC ADHESIVES

Most types of adhesives in widespread use are not covered by Australian standards. There is some overlap between adhesives and sealants. For example, silicone sealants are widely used as construction adhesives.

High strength adhesive tape

General description: A foam of cross linked polyethylene or closed cell acrylic coated both sides with a high performance acrylic adhesive system, encased in release liners of paper or polyester.

Product classification: Select tape to suit substrate as follows:

- Firm high strength foam tapes: For high energy surfaces including most bare metals such as stainless steel and aluminium.
- Conformable high strength foam: For the following:
 - . Medium energy surfaces including many plastics and paints, and bare metals.
 - . Lower energy surfaces including many plastics, most paints and powder coatings, and bare metals.

Thickness: Select the tape to make sure a mismatch between surfaces does not exceed half the tape thickness under the applied lamination pressure.

Total VOC limits

Requirement: Conform to the following:

- General purpose adhesives: [complete/delete]
- Structural glazing adhesive, timber flooring and laminate adhesives: [complete/delete]

Limiting VOC levels improves indoor air quality. Refer to Green Star submission guidelines to complete the prompts.

Conformance testing: To South Coast Air Quality Management District Rule 1168.

The purpose of this rule is to reduce emissions of volatile organic compounds (VOCs) and to eliminate emissions of chloroform, ethylene dichloride, methylene chloride, perchloroethylene, and trichloroethylene from the application of adhesives, adhesive bonding primers, adhesive primers, sealants, sealant primers, and other primers.

Consider editing and including this *Optional* text if required as a general quality standard.

2.12 FASTENERS

General

Masonry anchors: Proprietary expansion or bonded type anchors conforming to **SELECTIONS, ANCHORS**.

For further information, refer to the Australian Engineered Fasteners and Anchors Council (AEFAC) sample specifications. www.aefac.org.au/resources.php

Plain washers: To AS 1237.1.

- Provide washers to the heads and nuts of bolts, and the nuts of coach bolts.

Plugs: Proprietary purpose-made plastic.

Stainless steel fasteners: To ASTM A240/A240M.

Steel nails: To AS 2334.

- Length: At least 2.5 times the thickness of the member being secured, and at least 4 times the thickness if the member is plywood or building board less than 10 mm thick.

Unified hexagon bolts, screws and nuts: To AS/NZS 2465.

Fasteners in CCA treated timber: Epoxy coated or stainless steel.

Conformance to these standards is particularly important for structural applications and where durability is an issue (e.g. exposed coastal sites). A number of these standards exist partly to make sure dimensional compatibility, e.g. between nuts and bolts, and are based on international standards.

Mild steel, aluminium and zinc-plated fasteners should not be used in CCA treated timbers. Refer to NATSPEC TECHnote PRO 001. Epoxy coated or stainless steel are the preferred alternatives.

Bolts

Coach bolts: To AS/NZS 1390.

Hexagon bolts Grades A and B: To AS 1110.1.

Hexagon bolts Grade C: To AS 1111.1.

The product grade in the **Bolts, Nuts and Screws** cited standards refers to the quality of the product and to the size of the tolerances where grade A is the most precise and grade C is the least precise.

Corrosion resistance

Atmospheric corrosivity category: To *0171 General requirements*.

Steel products: Conform to the **Corrosion resistance table** or provide proprietary products with metallic and/or organic coatings of equivalent corrosion-resistance.

Corrosion resistance table

The **Corrosion resistance table** contains default values based on the AS/NZS 2312 series. BCA Volume 2 also has specific values for domestic sheet roofing in four environmental corrosivity categories which are aligned with AS 4312. Edit the table to suit the project and coordinate with other worksections. The internal and external project corrosivity categories are nominated in *0171 General requirements* from the following categories: C1 (very low), C2 (low), C3 (medium), C4 (high), C5 (very high) and T (inland tropical). These are described in AS 4312. The C5 categories, C5-I (industrial) and C5-M (marine), are not addressed in this table. For categories not covered in the table, consider corrosion protection requirements in more detail. See the various parts of AS/NZS 2699 where there are duplex protective coatings systems in addition to those given here. If internal elements are being painted, lower levels of zinc-coating may be considered. See also AS 3700 for corrosion resistance ratings.

For self-drilling screws in severe marine environments, indoor swimming pools or buildings with corrosive industrial processes, consult the roofing/cladding manufacturer on the requirements for shank corrosion protection.

For further information refer to NATSPEC TECHnote DES 010 on atmospheric corrosivity categories for ferrous products.

Atmospheric corrosivity category to AS 4312	Threaded fasteners and anchors		Powder actuated fasteners
	Material	Minimum local metallic coating thickness (µm)	Material
C1 and C2	Electroplated zinc or Hot-dip galvanized	30	Stainless steel 316
C3	Hot-dip galvanized	50	Stainless steel 316
C4 and T	Stainless steel 316	-	Stainless steel 316

Finishes

Electroplating:

- Metric thread: To AS 1897.
- Imperial thread: To AS 4397.

Galvanizing:

- Threaded fasteners: To AS/NZS 1214.
- Other fasteners: To AS/NZS 4680.

Mild steel fasteners: Galvanize if:

- Embedded in masonry.
- In external timbers.
- In contact with chemically treated timber other than CCA treated timber.

Epoxy coated: CCA treated timber.

Nuts

Hexagon chamfered thin nuts Grades A and B: To AS 1112.4.

Hexagon nuts Grade C: To AS 1112.3.

Hexagon nuts Style 1 Grades A and B: To AS 1112.1.

Hexagon nuts Style 2 Grades A and B: To AS 1112.2.

Screws

Coach screws: To AS/NZS 1393.

Hexagon screws Grades A and B: To AS 1110.2.

Hexagon screws Grade C: To AS 1111.2.

Hexagon socket screws: To AS 1420.

Self-drilling screws: To AS 3566.1.

Self-tapping screws:

- Crossed recessed countersunk (flat – common head style): To AS/NZS 4407.
- Crossed recessed pan: To AS/NZS 4406.
- Crossed recessed raised countersunk (oval): To AS/NZS 4408.
- Hexagon: To AS/NZS 4402.
- Hexagon flange: To AS/NZS 4410.
- Hexagon washer: To AS/NZS 4409.
- Slotted countersunk (flat – common head style): To AS/NZS 4404.
- Slotted pan: To AS/NZS 4403.
- Slotted raised countersunk (oval – common head style): To AS/NZS 4405.

Blind rivets

Description: Expanding end type with snap mandrel.

Type: Closed end for external application, open end for internal application.

End material:

- Aluminium base alloy for metallic-coated or prepainted steel.

Colorbond® (by BlueScope) is a widely used proprietary finish to aluminium-zinc coated steel. It has an organic coating and is available in various grades for forming into equipment, appliances, roofing, etc.

- Stainless steel for stainless steel sheet.
- Copper for copper sheet.

Size:

- For sheet metal to sheet metal: 3 mm.
- For sheet metal to supports, brackets and rolled steel angles: 4.8 mm.

3 EXECUTION

3.1 ADHESIVES

General

Requirement: Install to the manufacturer's recommendations.

Preparation

Substrates: Conform to the following:

- Remove any deposit or finish which may impair adhesion.
- If framed or discontinuous, provide support members in full lengths without splicing.
- If solid or continuous, remove excessive projections.
- If previously painted, remove cracked or flaking paint and lightly sand the surface.

Contact adhesive

Wall and floor adhesive is also referred to as mastic adhesive.

Precautions: Do not use contact adhesive if:

- A substrate is polystyrene foam.
- A PVC substrate may allow plasticiser migration.
- The adhesive solvent can discolour the finished surface.
- Dispersal of the adhesive solvent is impaired.

Two-way method: Immediately after application press firmly to transfer adhesive and then pull both surfaces apart. Allow to tack off and then reposition and press firmly together. Tap areas in contact with a hammer and padded block.

The two way method is recommended for locating non-loadbearing items.

One-way method: Immediately after application bring substrates together and maintain maximum surface contact for 24 hours by clamps, nails or screws as appropriate. If highly stressed, employ permanent mechanical fasteners.

The one way method is recommended for heavier panels.

High strength adhesive tape

Preparation:

- Non-porous surfaces: Clean with surface cleaning solvents such as isopropyl alcohol/water, wash down and allow to dry.
- Porous surfaces: Prime the surface with a contact adhesive compatible with the tape adhesive system.

Application to copper, brass, plasticised vinyl and hydrophilic surfaces such as glass and ceramics in a high humidity environment: Conform to manufacturer's recommendations.

Applied lamination pressure: Make sure the tape experiences 100 kPa.

Application temperature: Generally above 10°C and to the manufacturer's recommendations.

Completion: Do not apply loads to the assembly for 72 hours at 21°C.

3.2 JOINT SEALING

General

Requirement: Install to the manufacturer's recommendations.

Joint preparation

Cleaning: Cut flush joint surface protrusions and rectify if required. Mechanically clean joint surfaces free of any deposit or finish which may impair adhesion of the sealant. Immediately before sealant application, remove loose particles from the joint, using oil-free compressed air.

Bond breaking: Install bond breaking backing material.

Taping: Protect the surface on each side of the joint using 50 mm wide masking tape or equivalent means. On completion of sealant application remove the tape and remove any stains or marks from adjacent surfaces.

Primer: Apply the recommended primer to the surfaces in contact with sealant materials.

Sealant joint proportions

General weatherproofing joints (width:depth):

- 1:1 for joint widths less than 12 mm.
- 2:1 for joint widths greater than 12 mm.

Often detailed on drawings.

Sealant application

General: Apply the sealant to dry joint surfaces using a pneumatic applicator gun. Make sure the sealant completely fills the joint to the required depth, provides good contact with the full depth of the sides of the joint and traps no air in the joint. Do not apply the sealant outside the recommended working time for the material or the primer.

Weather conditions

Two pack polyurethanes: Do not apply the sealant if ambient conditions are outside the following:

- Temperature: Less than 5°C or greater than 40°C.
- Humidity: To the manufacturer's recommendations.

Joint finish

General: Force the sealant into the joint and finish with a smooth, slightly concave surface using a tool designed for the purpose.

Excess sealant: Remove from adjoining surfaces using cleaning material nominated by the sealant manufacturer.

Protection

General: Protect the joint from inclement weather during the setting or curing period of the material.

Rectification

General: Cut out and remove damaged portion of joint sealant and reinstall so repaired area is indistinguishable from undamaged portion.

3.3 CONSTRUCTION GROUTS**General**

Requirement: Install to the manufacturer's recommendations.

See the product Technical Datasheet for mixing and application instructions.

Preparation

Substrates: Conform to the following:

- Surface: Clean, sound and free from oil, grease, curing compound or any loose materials. Mechanically abrade to a sound surface.
- Bolts and anchor holes: Clean and free from dust or loose material.
- Base plates: Free from rust, oil or grease. Provide air pressure relief holes for venting.
- Pre-soaking: Before application, pre-soak substrate with water for a minimum of 6 hours. Immediately before grouting, remove excess water, including water in bolts and anchor holes.

Formwork

Requirement: Construct to facilitate rapid and continuous filling, remaining leak proof and water tight. Provide foam rubber strips or suitable sealants under the formwork to the manufacturer's recommendations.

Unrestrained surfaces: Keep to a minimum.

It is advisable not to leave any unrestrained areas.

High temperature working

Requirement: Where possible, erect shade screens to protect the installation area from direct sunlight and schedule grouting for early morning or late afternoon.

Storage: Keep materials cool and away from direct sunlight.

3.4 TESTING**Installed sealant tests**

Sampling: For each sealant test, take 3 samples of installed and cured sealant, each at least 50 mm long, from completed joints.

Reinstatement: Repair-as-new the joints from which the samples were taken.

Installed sealant tests schedule

Item to be tested	Property to be tested	Applicable standard

See ISO 11600 Table 4 for elongation, amplitude and compression tests for glazing (Type G) and Contraction (Type F) sealants. Delete if not required or if they are nominated in other worksections.

3.5 FASTENERS**General**

Requirement: Install to the manufacturer's recommendations.

Fastening to wood and steel

Timber substrates: To AS 1720.1 Section 4.

Self-drilling screws: To AS 3566.1 for timber and steel substrates.

Masonry anchors

Installation: To the manufacturer's recommendations.

4 SELECTIONS

Schedules are a way of documenting a selection of proprietary or generic products or systems by their properties. Indicate their locations here and/or on the drawings. Refer to NATSPEC TECHnote GEN 024 for guidance on using and editing schedules.

Cross reference

If adhesives or sealants are selected and specified here for particular applications, provide cross references in the relevant worksections directing the reader to this schedule and delete text that may be redundant or contradictory.

Delete items from these Schedules if they are to be selected by the contractor as part of general construction.

4.1 ADHESIVES**Application schedule**

Application	Product	Relevant worksections
Adhesive fixed timber strip flooring and parquet systems	Bostik Ultraset DX Bostik Ultraset S Bostik Ultraset SF Bostik Ultraset HP Bostik Ultraset Greenforce Bostik Ultraset Singlestep2	0655 Timber flooring
Colourback glass faced wall panels or splashbacks	Bostik Xtreme High Tack Bostik V60	0551 Joinery, 0641 Applied wall finishes

Timber joinery fitments	Bostik Xtreme High Tack	0551 Joinery

Application	Product	Relevant worksections
Mechanical services	Bostik Seal N Flex 1 Bostik Seal N Flex FC	0732 Air filters, 0744 Ductwork insulation, 0752 Mechanical piping insulation, 0762 Cool rooms
Hydraulic services	Bostik PVC Priming Fluid Bostik PVC Pipe Cement - Type P (pressure) Bostik PVC Pipe Cement Slow Setting - Type N (non-pressure)	0802 Hydraulic design and install, 0812 Tapware

Describe the location and details or refer to the drawings.

Mechanical services: Check for fire and/or acoustic properties requirements.

Relevant worksection: Coordinate the selection with related default text.

4.2 ANCHORS

Bonded anchor schedule

Property	A	B	C
Adhesive			
Anchor rod: Diameter (mm)			
Anchor rod: Length (mm)			
Anchor rod: Finish/coating			
Anchor rod: Strength grade			
Anchor rod: Depth of embedment (mm)			
Anchor rod: Part number			
Drill hole: Diameter (mm)			
Drill hole: Depth (mm)			
Tightening torque (Nm)			

A, B, C: These designate each instance or type or location of the item scheduled. Edit to align with the project's codes or tags.

Edit codes in the **Schedule** to match those on drawings.

Adhesive: Insert required adhesive to manufacturer's recommendations.

Anchor rod: Finish/coating: e.g. Galvanized/Class 4.

Anchor rod: Strength grade: e.g. Class 5.8.

Anchor rod: Part number: Insert the manufacturer's part number.

Tightening torque: Insert if applicable.

Expansion anchor schedule

Property	A	B	C
Anchor name			
Part number			
Size			
Finish/coating			
Drill hole: Diameter (mm)			
Drill hole: Depth (mm)			

Property	A	B	C
Socket size (mm)			
Tightening torque (Nm)			

A, B, C: These designate each instance or type or location of the item scheduled. Edit to align with the project's codes or tags.

Edit codes in the **Schedule** to match those on drawings.

Anchor name: Insert the manufacturer's anchor name.

Part number: Insert the manufacturer's part number.

Finish/coating: e.g. Galvanized/Class 4.

4.3 SEALING, POINTING AND BEDDING

Application schedule

Application	Product	Relevant worksections
Metal flashings and rainwater goods	Bostik Roof & Gutter Bostik Xtreme Flex	0421 Roofing – combined, 0423 Roofing – profiled sheet metal, 0424 Roofing – seamed sheet metal, 0425 Roofing – shingles and shakes, 0426 Roofing – slate, 0427 Roofing – tiles
Metal flashings and sealing non-porous substrates	Bostik 5CLM Bostik Xtreme Flex	0431 Cladding – combined, 0432 Curtain walls, 0434 Cladding – flat sheets and panels, 0435 Cladding – planks and weatherboards, 0436 Cladding – profiled and seamed sheet metal, 0437 Cladding – sheet and pre-assembled systems
Window and external doors	Bostik V60 Bostik Xtreme Flex	0432 Curtain walls, 0451 Windows and glazed doors, 0453 Doors and access panels, 0463 Glass blockwork
Mechanical services	Bostik Fireban One Bostik Firecaulk Bostik Xtreme Fire Seal	0724 Air handling plant – combined, 0725 Air handling plant – built-up, 0726 Air handling plant – minor, 0727 Air handling plant – packaged, 0732 Air filters, 0741 Ductwork 0702 Mechanical design and install, 0752 Mechanical piping insulation, 0762 Cool rooms
Hydraulic services	Bostik 6S	0811 Sanitary fixtures, 0812 Tapware, 0813 Water heaters, 0815 Boiling, chilled and filtered water dispensers

Describe the location and details or refer to the drawings.

Mechanical services: Check for fire and/or acoustic properties requirements.

Relevant worksection: Coordinate the selection with related default text.

Adhesives, sealant and fasteners combined function

Application	Product	Relevant worksections
Cool room fixing and sealing	Bostik Xtreme Seal & Fix	0762 Cool rooms
Fixing and sealing acoustic ceiling tiles	Bostik Xtreme Seal & Fix	0531 Suspended ceilings – combined

Application	Product	Relevant worksections
Control joints tile adhesives and wet area sealants	Bostik Xtreme Seal & Fix	0631 Ceramic tiling, 0632 Stone and terrazzo tiling
Timber floor control joints, adhesives and fixings	Bostik Xtreme Seal & Fix	0655 Timber flooring, 0654 Engineered panel flooring
Wet area sealants and lightweight detail items	Bostik Xtreme Seal & Fix	0525 Cubicle systems, 0551 Joinery, 0811 Sanitary fixtures

Describe the location and details or refer to the drawings.

Relevant worksection: Coordinate the selection with related default text.

4.4 SEALING STRUCTURALLY DESIGNED CONTROL JOINTS

Application schedule

Application	Sealant type	Sealant colour	Relevant worksection
Internal masonry control joints	Bostik Seal N Flex 1 Bostik Seal N Flex FC	12 colours available Black/Grey/White	0322 Tilt-up concrete, 0331 Brick and block construction, 0332 Stone masonry
External masonry control joints	Bostik Seal N Flex 1 Bostik Seal N Flex FC	12 colours available Black/Grey/White	0322 Tilt-up concrete, 0331 Brick and block construction, 0332 Stone masonry
Trafficable masonry control joints	Bostik 5CLM Bostik Seal N Flex FC Bostik Seal N Flex 1	White/Charcoal/Grey/Beige Black/Grey/White 12 colours available	0274 Concrete pavement, 0275 Paving – mortar and adhesive bed

Describe the location and details or refer to the drawings.

Sealant colour: Select from:

- Bostik 5CLM: Charcoal, Light Grey, Dark Grey, Beige, White.
- Bostik Seal N Flex FC: Black, Grey, White
- Bostik Seal N Flex 1: Select from Grey, Black, White, Limestone, Bahama Beige, Sandstone, Redwood, Off White, Manilla Sand, Classic Bone, Epping Grey.

Relevant worksection: Coordinate the selection with related default text.

4.5 FIRE-RESISTING SEALANTS

Application schedule

Application	Sealant	Sealant colour	Fire-resistance level to AS 1530.4 (FRL)	Relevant worksection
Masonry control joints	Bostik Fireban One Bostik Xtreme Fire Seal	Limestone White	Up to -/240/240	0322 Tilt-up concrete, 0331 Brick and block construction, 0332 Stone masonry
Internal pointing and stopping (including acoustic applications)	Bostik Firecaulk		Up to -/240/240	0182 Fire-stopping, 0346 Structural fire protection systems, 0472 Acoustic insulation

Describe the location and details or refer to the drawings.

Sealant colour: Select from:

- Bostik Firecaulk: White, Off White, Grey, or Limestone.

Fire-resistance level to AS 1530.4 (FRL): Request test results from Bostik Technical Department, rating varies with design detail.

- Bostik Fireban One: e.g. -/120/120, -/180/180, -/240/240.
- Bostik Firecaulk: e.g. -/120/120, -/180/180, -/240/240.

Relevant worksection: Coordinate the selection with related default text.

REFERENCED DOCUMENTS
