0673P AKZONOBEL IN POWDER COATINGS

Branded worksection
This branded worksection Template has been developed by NATSPEC in conjunction with AkzoNobel Powder Coatings Ltd (the Product Partner) and may be used whilst the Product Partner is licensed to distribute it. The copyright remains with NATSPEC. As with all NATSPEC worksections, it is the responsibility of the user to make sure it is completed appropriately for the project. The user should also review its applicability for local conditions and regulations. Check www.natspec.com.au for the latest updated version.

Worksection abstract
This worksection Template is applicable to the nominated INTERPON powder coating products aluminium and metal substrates for long term exposure in the exterior environment. It is applicable to the off-site application of thermoset powder coating systems for architectural applications, and to exterior and interior buildings elements. The primary referenced standards are AS 3715, AAMA 2603, AAMA 2604 and AAMA 2605 for aluminium and aluminium alloy substrates and AS 4506 for metal substrates (other than aluminium).

Guidance text
All text within these boxes is provided as guidance for developing this worksection and should not form part of the final specification. This Guidance text may be hidden or deleted from the document using the NATSPEC Toolbar or the hidden text Hide and Delete functions of your word processing system. For additional information visit FAQs at www.natspec.com.au.

Optional style text
Text in this font (blue with a grey background) covers items specified less frequently. It is provided for incorporation into Normal style text where it is applicable to a project.

Related material located elsewhere in NATSPEC
If a listed worksection is not part of your subscription package and you wish to purchase it, contact NATSPEC.
Related material may be found in other worksections. See for example:
- 0183 Metals and prefinishes.
- 0432 Curtain walls.
- 0434 Cladding – flat sheets and panels.
- 0451 Windows and glazed doors.
- 0454 Overhead doors.
- 0456 Louvre windows.
- 0457 External screens.
- 0524 Partitions – glazed.
- 0525 Cubicle systems.
- 0552 Metalwork – fabricated.
- 0702 Mechanical design and install.
- 0711 Chillers – combined.
- 0721 Packaged air conditioning.
- 0724 Air handling plant – combined.
- 0731 Fans.
- 0732 Air filters.
- 0745 Attenuators and acoustic louvres.
- 0746 Air grilles.
- 0761 Refrigeration.
- 0762 Cool rooms.
- 0781 Mechanical electrical.
- 0814 Hydraulic pumps.
- 0941 Switchboards – proprietary.
- 0942 Switchboards – custom-built.

Documenting this and related work
You may document this and related work as follows:
- Adapt the schedules in SELECTIONS to a Finishes schedule to your office documentation policy.
See NATSPEC TECHnote DES 010 on atmospheric corrosivity categories for ferrous products.

The Normal style text of this worksection may refer to items as being documented elsewhere in the contract documentation. Make sure they are documented.

Search acumen.architecture.com.au, the Australian Institute of Architects’ practice advisory subscription service, for notes on the following:

- Guarantees and warranties.

Specifying ESD

The following may be specified by including additional text:

- Coating systems where powder overspray is recovered and recycled back into the system.
- Coatings systems using energy efficient resin curing methods to reduce energy requirements, through more efficient curing ovens or thinner film coatings.
- Coatings systems incorporating bio-resins instead of petrochemical-based resins.

Refer to the NATSPEC TECHreport TR 01 on specifying ESD.

1 GENERAL

Interpon Powder Coatings, part of the AkzoNobel group, is the largest global manufacturer of powder coatings and a world leader in powder coatings technology. Headquartered in Sassenheim, The Netherlands, Interpon Powder Coatings has 29 manufacturing and Research & Development facilities worldwide and 25 sales offices, employing over 4,000 people globally.

Their global reach allows us to offer a wide range of stock and custom made powder coating colours, finishes and technologies.

1.1 RESPONSIBILITIES

General

Requirement: Provide AkzoNobel (INTERPON) powder coating systems to aluminium and metal substrates in the exterior and interior environment, as documented.

Documented is defined in 0171 General requirements as meaning contained in the contract documents.

1.2 COMPANY CONTACTS

Technical contacts

Website: www.specifyinterpon.com.au

1.3 CROSS REFERENCES

General

Requirement: Conform to the following:

- 0171 General requirements.

0171 General requirements contains umbrella requirements for all building and services worksections.

List the worksections cross referenced by this worksection. 0171 General requirements references the 018 Common requirements subgroup of worksections. It is not necessary to repeat them here. However, you may also wish to direct the contractor to other worksections where there may be work that is closely associated with this work.

NATSPEC uses generic worksection titles, whether or not there are branded equivalents. If you use a branded worksection, change the cross reference here.

1.4 STANDARDS

General

Application to aluminium and aluminium alloy substrates for architectural applications: To AS 3715, AAMA 2603, AAMA 2604 or AAMA 2605, as appropriate.

Architectural applications include extruded sections for the following:

- Windows and doors.
- Balustrades.
- Other external elements, such as louvres and grilles.

Application to metal substrates (other than aluminium) for architectural applications: To AS 4506.

AS 4506 Table 2.1 includes extruded and sheet aluminium and cast aluminium, zinc, zinc alloys, steel, zinc coated steel, stainless steel, copper and copper alloys, and gives minimum coating thicknesses, required tests and offers examples of appropriate pre-treatment.
1.5 MANUFACTURER’S DOCUMENTS

Technical manuals
Website: www.specifyinterpon.com.au
Product data sheets:

1.6 INTERPRETATION

Definitions
General: For the purposes of this worksection the following definitions apply:
- Powder coating: The process of preparing, applying, fusing and curing a thermoset powder coating material to a substrate.
- Thermoset powder coating: A mixture of finely ground particles of pigment and resin sprayed on to a prepared substrate. Charged powder particles adhere to electrically grounded surfaces until heated and fused into a smooth coating in a curing oven.
- Polyester powder coating: Uses an enhanced polyester resin.
- Fluoropolymer powder coating: Uses PTFE (poly tetra fluoro ethylene) for aluminium substrates.
- Substrate: The surface to which a material or product is applied.

Edit the Definitions subclause to suit the project or delete if not required. List alphabetically.

1.7 SUBMISSIONS

Products and materials
AkzoNobel: Submit the following details at least 3 weeks before fabrication:
- Recommended INTERPON coating system for the nominated service condition.
- Storage and handling recommendations.
- INTERPON product data sheets.
- Maintenance recommendations.

Samples
Powder coating samples: Submit samples of each coating system on representative substrates, showing surface preparation, colour, gloss level, texture, and physical properties.

INTERPON powder coated samples schedule

<table>
<thead>
<tr>
<th>Substrate</th>
<th>Coating system</th>
<th>Colour/texture</th>
<th>Sample size/Number</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Subcontractors
Specialist applicators: Submit name and contact details of proposed specialist applicators as registered by AkzoNobel.

Warranties
General: Submit AkzoNobel’s warranties, as documented.
Requirement: Submit the following:
- [complete/delete]

Applicable warranties to AAMA specifications are as follows (refer to Schedules):
- Film integrity: 10 years for AAMA 2603, 20 years for AAMA 2604 or 30 years for AAMA 2605.
- Colour integrity: 10 years for AAMA 2603, 15 years for AAMA 2604 or 20 years for AAMA 2605.

Describe the requirements of warranties in PRODUCTS, EXECUTION or SELECTIONS, as appropriate, and list the submissions required here.
2 PRODUCTS

2.1 GENERAL

Product substitution
Other products: Conform to PRODUCTS, GENERAL, Substitutions in 0171 General requirements.

The 0171 General requirements clause sets out the submissions required if the contractor proposes alternative products. Refer also to NATSPEC TECHnote GEN 006 for more information on proprietary specification.

Product identification
General: Marked to show the following:
- Manufacturer’s identification.
- Product brand name.
- Product type.
- Quantity.
- Product reference code and batch number.
- Material composition and characteristics such as volatility, flash point, light fastness, colour and pattern.

Edit the list to suit the project or delete if not required.

2.2 INTERPON D2015 ULTRIVA® AND INTERPON D2525

General
Proprietary item: INTERPON D2015 Ultriva® AND INTERPON D2525
Description: An advanced durability powder coating for architectural aluminium components.

INTERPON D2015 Ultriva® & INTERPON D2525 can be applied by manual or automatic electrostatic spray equipment. To ensure the highest consistency of metallic coatings the powder should always be applied from a fluidised hopper. Unused or over-sprayed powder coating can be reclaimed up to a maximum of 20% using suitable equipment and recycled through the coating system. Frequent, small additions of reclaim powder to the hopper are recommended.

Warranty
Film integrity: 20 years to AAMA 2604.
Colour integrity: 15 years to AAMA 2604.

2.3 INTERPON D3020 FLUOROMAX®

General
Proprietary item: INTERPON D3020 Fluoromax®
Description: Hyper-durable powder coatings conforming to AAMA 2605.

AkzoNobel’s Fluoromax® technology uses fluorocarbon polymer chemistry for maximum gloss and colour retention in service, and to provide cosmetic and functional protection. It offers a technically and environmentally benign alternative to liquid PVF2 systems, applied by manual or automatic electrostatic spray equipment.

For solid shades, unused powder can be reclaimed using suitable equipment and recycled through the coating system. For mixed colours and certain special finishes, advice must be sought from AkzoNobel on the suitability of the product for recycling.

Warranty
Film integrity: 30 years to AAMA 2605.
Colour integrity: 20 years to AAMA 2605.

2.4 INTERPON D1000

General
Proprietary item: INTERPON D1000.
Description: A triglycidylisocyanurate (TGIC) free polyester based powder coating.

INTERPON D1000 is formulated on AkzoNobel’s proprietary resin technology for architectural aluminium, galvanized steel and steel components. It is designed for the exterior environment, and offers long term light and weather resistance from a single coat finish on a variety of substrates. It exhibits a tough cured film which provides damage resistance to packaging materials. It incorporates AkzoNobel’s patented Particle Management Technology. INTERPON D1000 can be applied by manual or automatic electrostatic spray equipment. Unused or over-sprayed powder coating can be reclaimed and recycled through the coating system.
Warranty
Film integrity: 10 years to AAMA 2603.
Colour integrity: 10 years to AAMA 2603.
Residential grade powder coating: Building class 1 & 10 only, at least 100 m from waterfront to AS 3715.

3 EXECUTION

3.1 PREPARATION

Substrate
Substrate pre-treatment:
- Powder coating to aluminium: To AS 3715 Appendix G.
- Powder coating to metals, other than aluminium: To AS 4506 Appendix I.

These standards require that the surface of the substrate receives a pre-treatment and application of a conversion coating prior to the commencement of the powder coating process.

3.2 APPLICATION

General
Requirement: Conform to the INTERPON product data sheets.

3.3 COMPLETION

Cleaning
Aluminium architectural applications: Clean completed assembly to AS 3715 Appendix C, and perform maintenance during the construction and defects liability period as indicated.
Metal, other than aluminium, architectural applications: Clean completed assembly to AS 4506 Appendix D, and perform maintenance during the construction and defects liability period as indicated.

Cleaning and maintenance is commonly a condition of warranty. Contact the coating manufacturer. These standards recommend various frequency of cleaning varying from monthly to six monthly depending on the local environment. Refer to SUBMISSIONS for maintenance recommendations.

4 SELECTIONS

Schedules are a way of documenting a selection of proprietary or generic products or systems by their properties. Indicate their locations here and/or on the drawings. Refer to NATSPEC TECHnote GEN 024 for guidance on using and editing schedules.

4.1 ALUMINIUM FOR ARCHITECTURAL APPLICATIONS

INTERPON product schedule

</tr>
</tbody>
</table>

Provide a separate Schedule for each proprietary item.
A1, A2, A3: These designate each instance or type or location of the item scheduled.
Edit codes in the Schedule to match those on drawings.
Proprietary item:
• INTERPON D2015 Ulitra® and INTERPON D2525.
• INTERPON D3020 Fluoromax®.

Application: Nominate the particular project item. e.g. Frame extrusions, Louvres, Balustrades, Cladding.

Location: Nominate the drawing reference or location.

Substrate: Extruded aluminium or Cast aluminium. Confirm product suitability with AkzoNobel.

Service condition category to AS 3715: Clause 1.4 describes service condition categories for powder coated aluminium architectural applications based on the severity of the environment. Select from the following atmospheric environments:
• Category 3 – Exterior mild to moderate.
• Category 4 – Tropical.
• Category 5 – Exterior severe.
• Categories 1 and 2 (applicable to interior environments) are not included in AS 3715 (Clause 1.4).

Colour: Consult AkzoNobel’s colour charts.

Gloss level: Gloss level: e.g. Texture, Matt, Satin or Gloss. Not all gloss levels are available across the colour ranges.

### 4.2 MISCELLANEOUS ARCHITECTURAL APPLICATIONS

**INTERPON metal substrates product schedule**

<table>
<thead>
<tr>
<th>Property</th>
<th>M1</th>
<th>M2</th>
<th>M3</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTERPON D1000</td>

<td></td>
<td></td>
</tr>
<tr>
<td>Gloss level</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

M1, M2, M3: These designate each instance or type or location of the item scheduled.

Edit codes in the Schedule to match those on drawings.

Application: Nominate the particular project item. e.g. Frame extrusions, Louvres, Balustrades, Cladding.

Location: Nominate the drawing reference or location.

Substrate: Blasted steel, Hot dip galvanized steel, Extruded aluminium or Cast aluminium. Confirm product suitability with AkzoNobel.

Service condition category to AS 4506: Clause 1.4 specifies six atmospheric classifications based on the severity of the environment. The categories are similar to those defined in AS 4312. Select from the following:
• Category A: Mild interior (Atmospheric classification: Very low).
• Category B: Moderate interior (Atmospheric classification: Low).
• Category C: Mild exterior (1) and Moderate exterior (2) (Atmospheric classification: Medium).
• Category D: Tropical exterior (Atmospheric classification: High marine / industrial).
• Category E to E-1: Industrial, E-M Marine (Atmospheric classification: Very high marine / industrial).
• Category F: Tropical exterior (Inland tropical).

See also NATSPEC TECHnote DES 010 on atmospheric corrosivity categories for ferrous products.

Colour: Consult AkzoNobel’s colour charts.

Gloss level: Gloss level: e.g. Texture, Matt, Satin or Gloss. Not all gloss levels are available across the colour ranges.
